Serious Safety Event STAT Huddle Improving Employee and Patient Safety

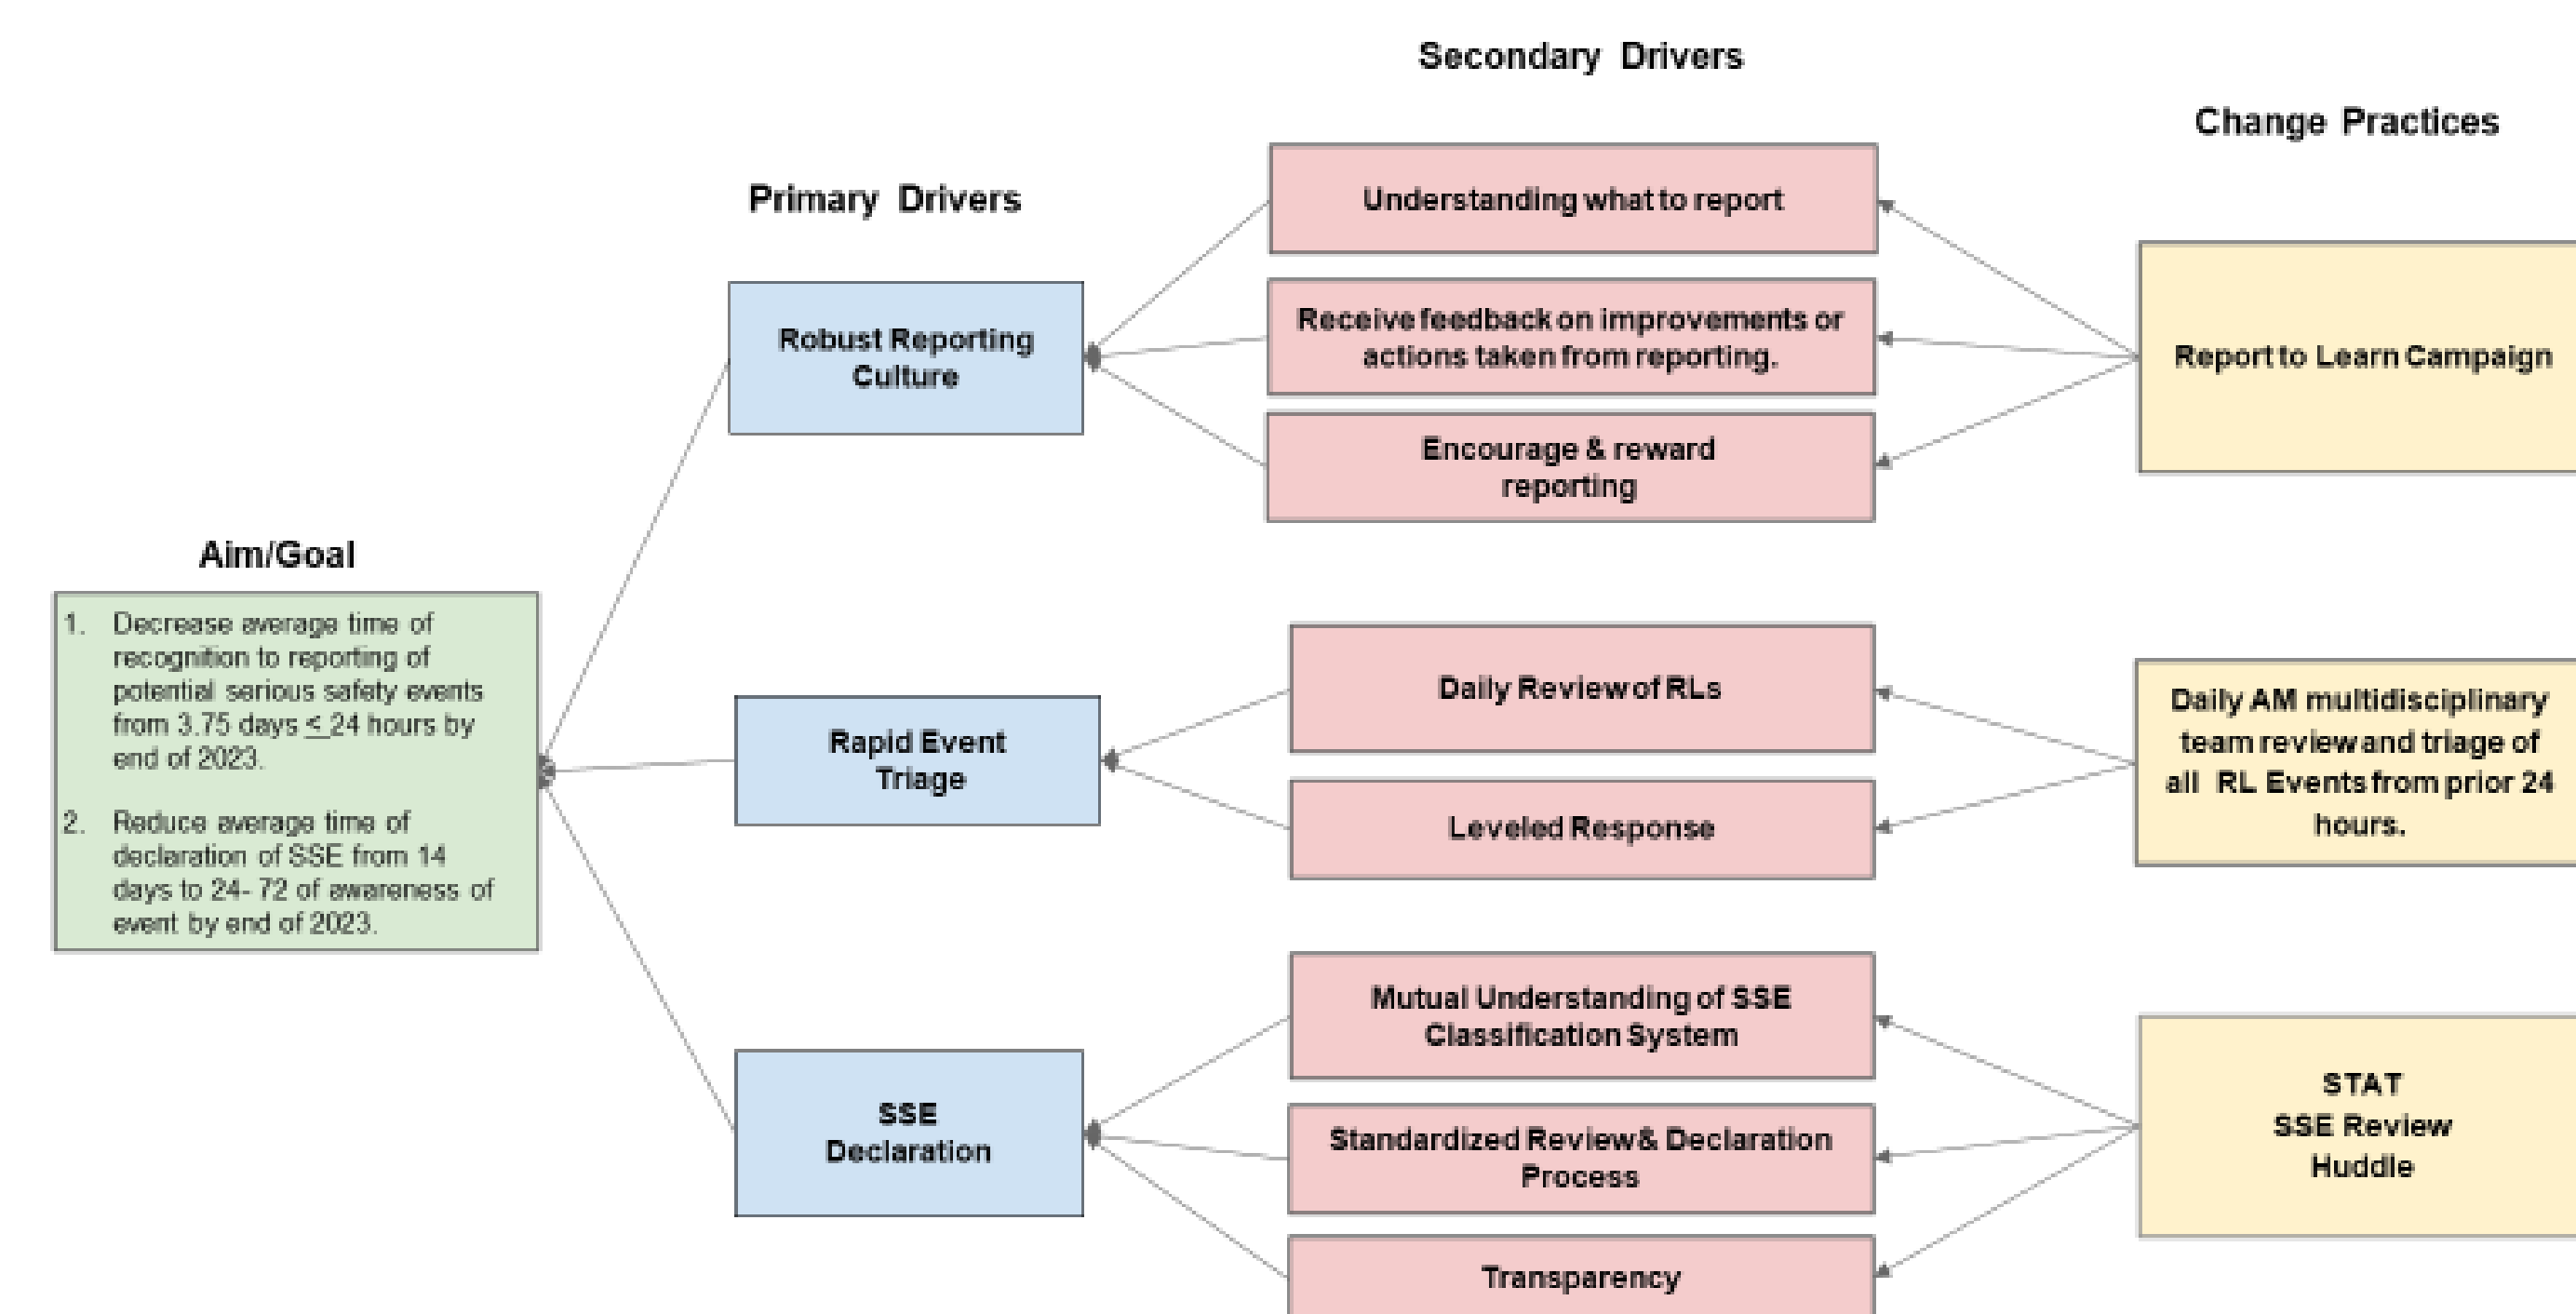

A. Renee Richards Director Performance Improvement & Quality – HFWH, Jane Ziemba Quality Risk Specialist – HFWH, Megan Prochazka Quality Risk Specialist – HFWH, Dr. Brooke Buckley, CMO – HFWH, Kim Meeker CNO- HFWH, Tom McKeown HFWH BOT (Former Director MS Quality), Rand O’Leary, President-HFWH

AIM

Safest Care and Best Outcome Opportunity: Reduce delays in awareness and declaration of serious safety events to:

- Expedite immediate actions to ensure patient and employee safety.
- Understanding what is preventable at the time of harm occurrence
- Addressing immediate needs of patient, family, and caregivers.
- Chartering Root Cause Analysis team to focus on process opportunities may have led to contributed to the serious safety event.

PLAN: CURRENT STATE

DO: CORRECTIVE ACTIONS / INTERVENTIONS

Engage with key stakeholders to define the WHY and understand the Why and the barriers.

Identify current state and opportunities to improve.

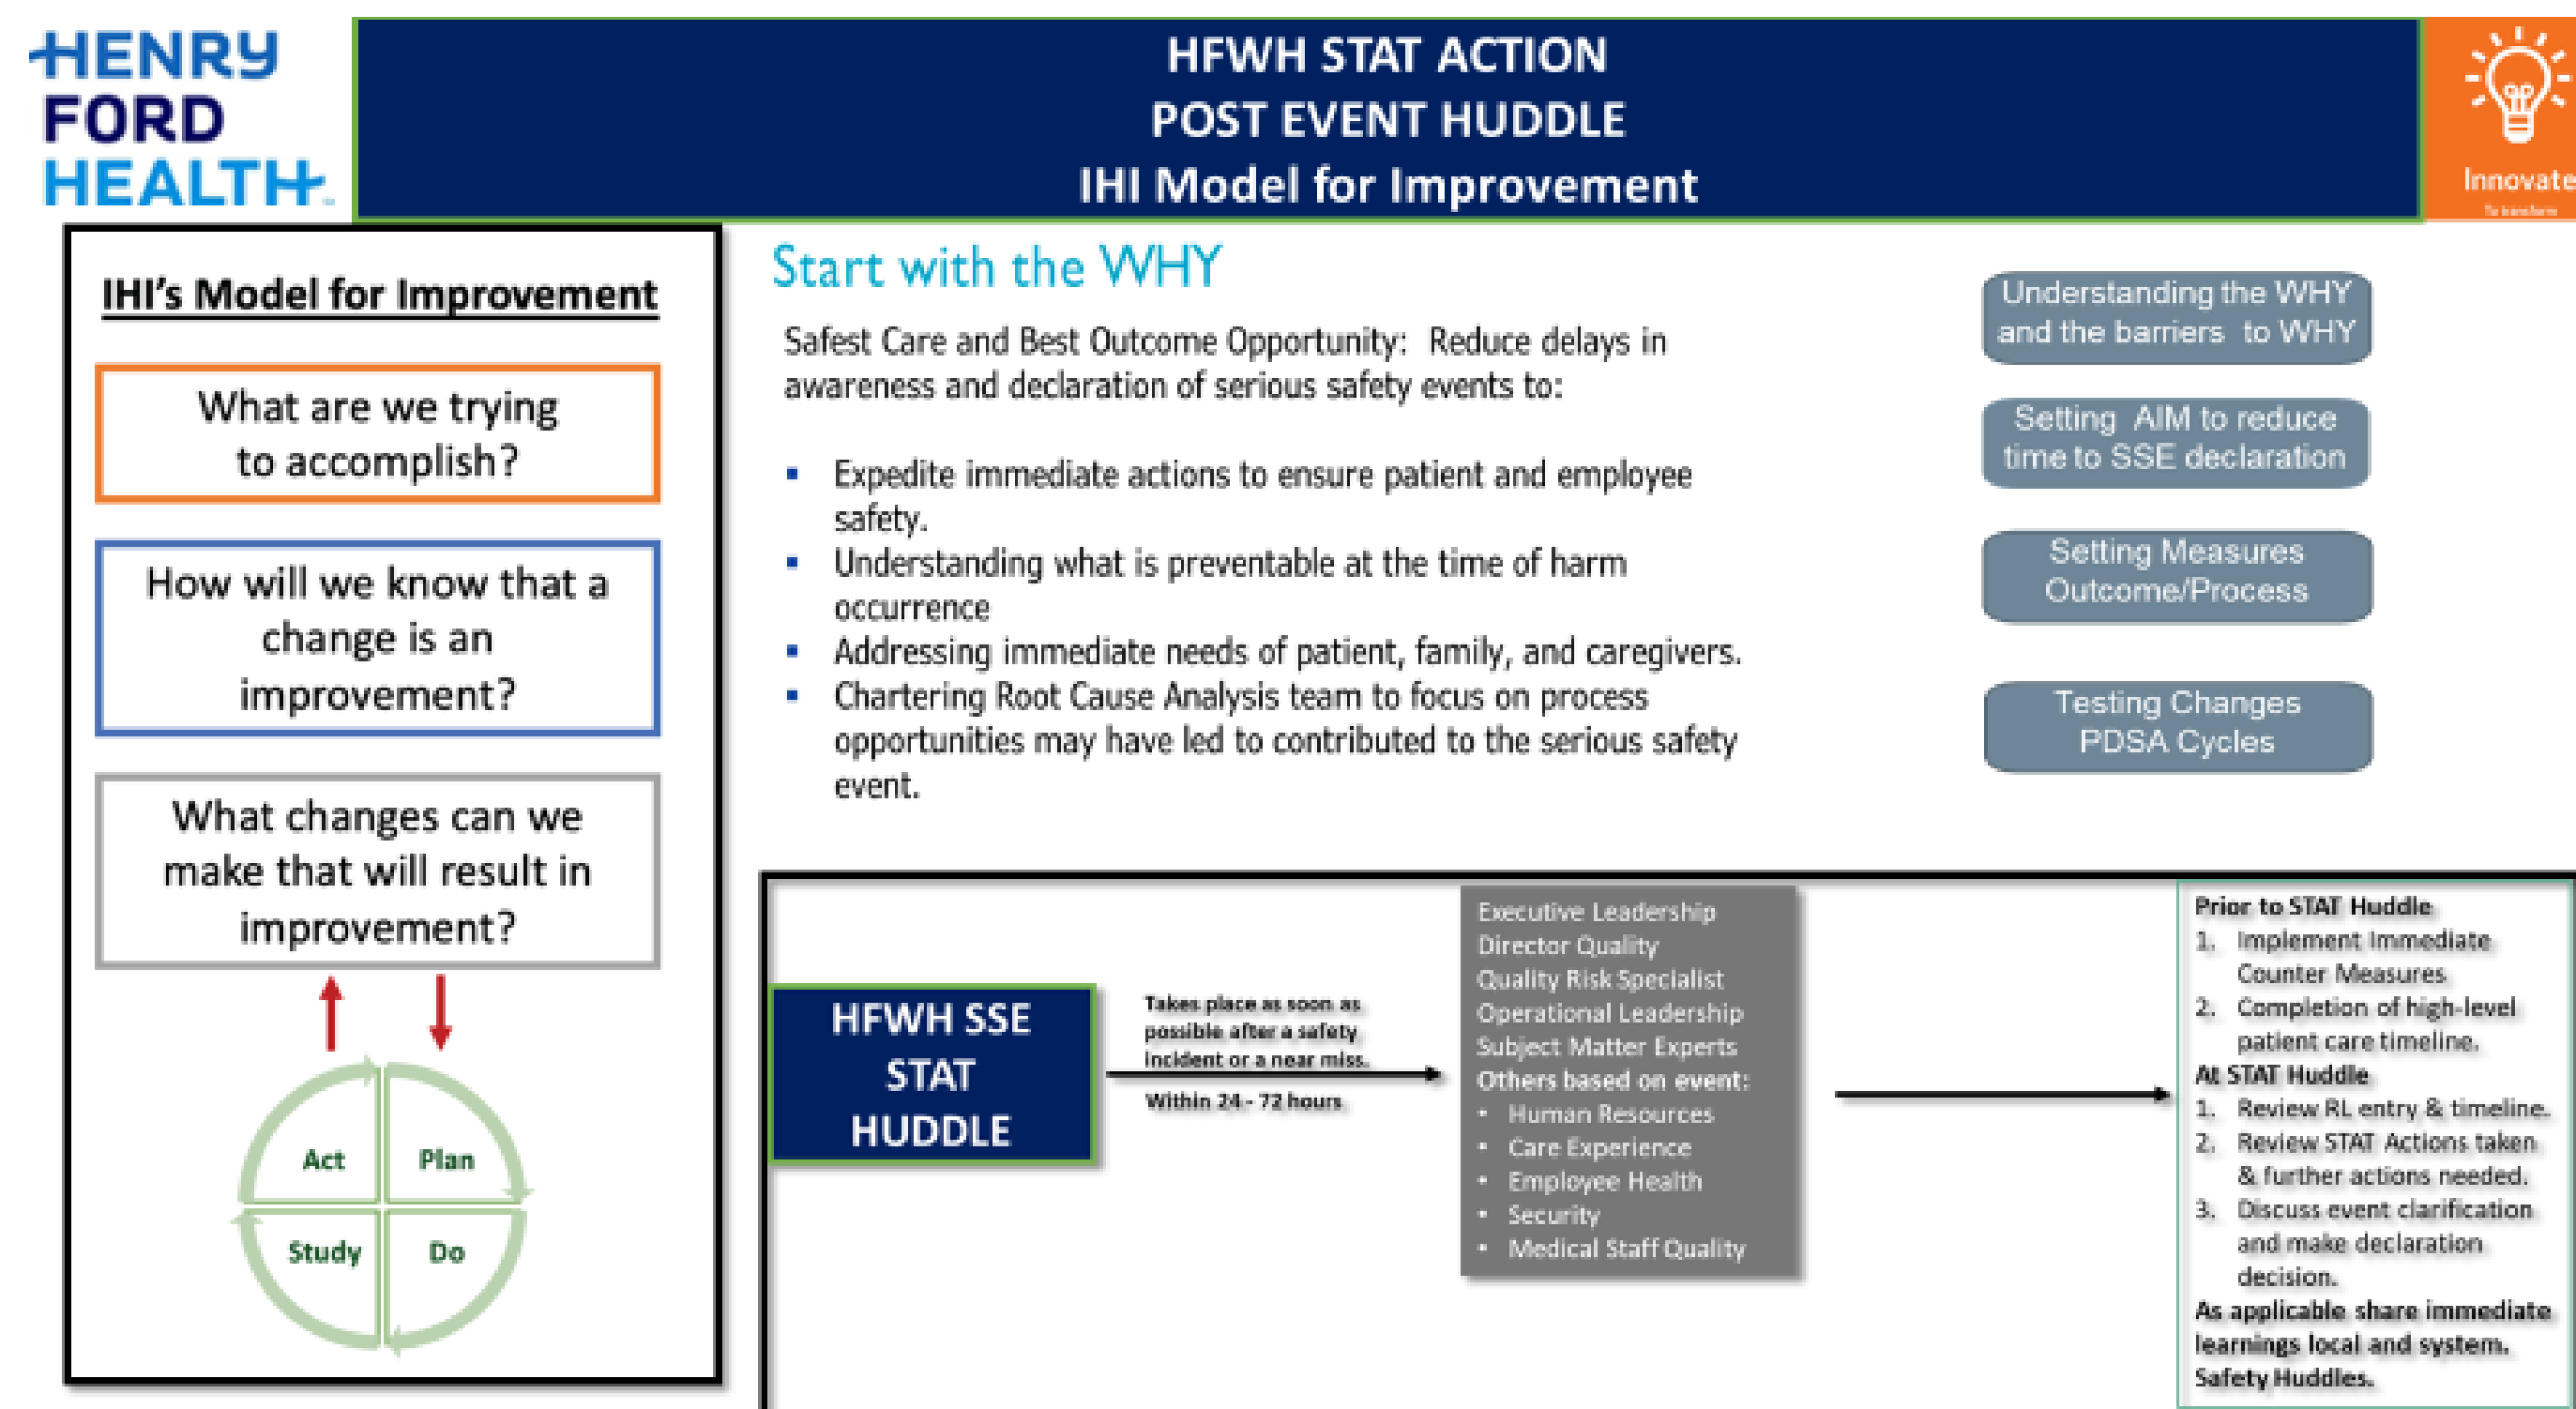

Set aim for improvement – Best practice research (ASHRM & IHI).

Identify future state and conduct small tests of change.

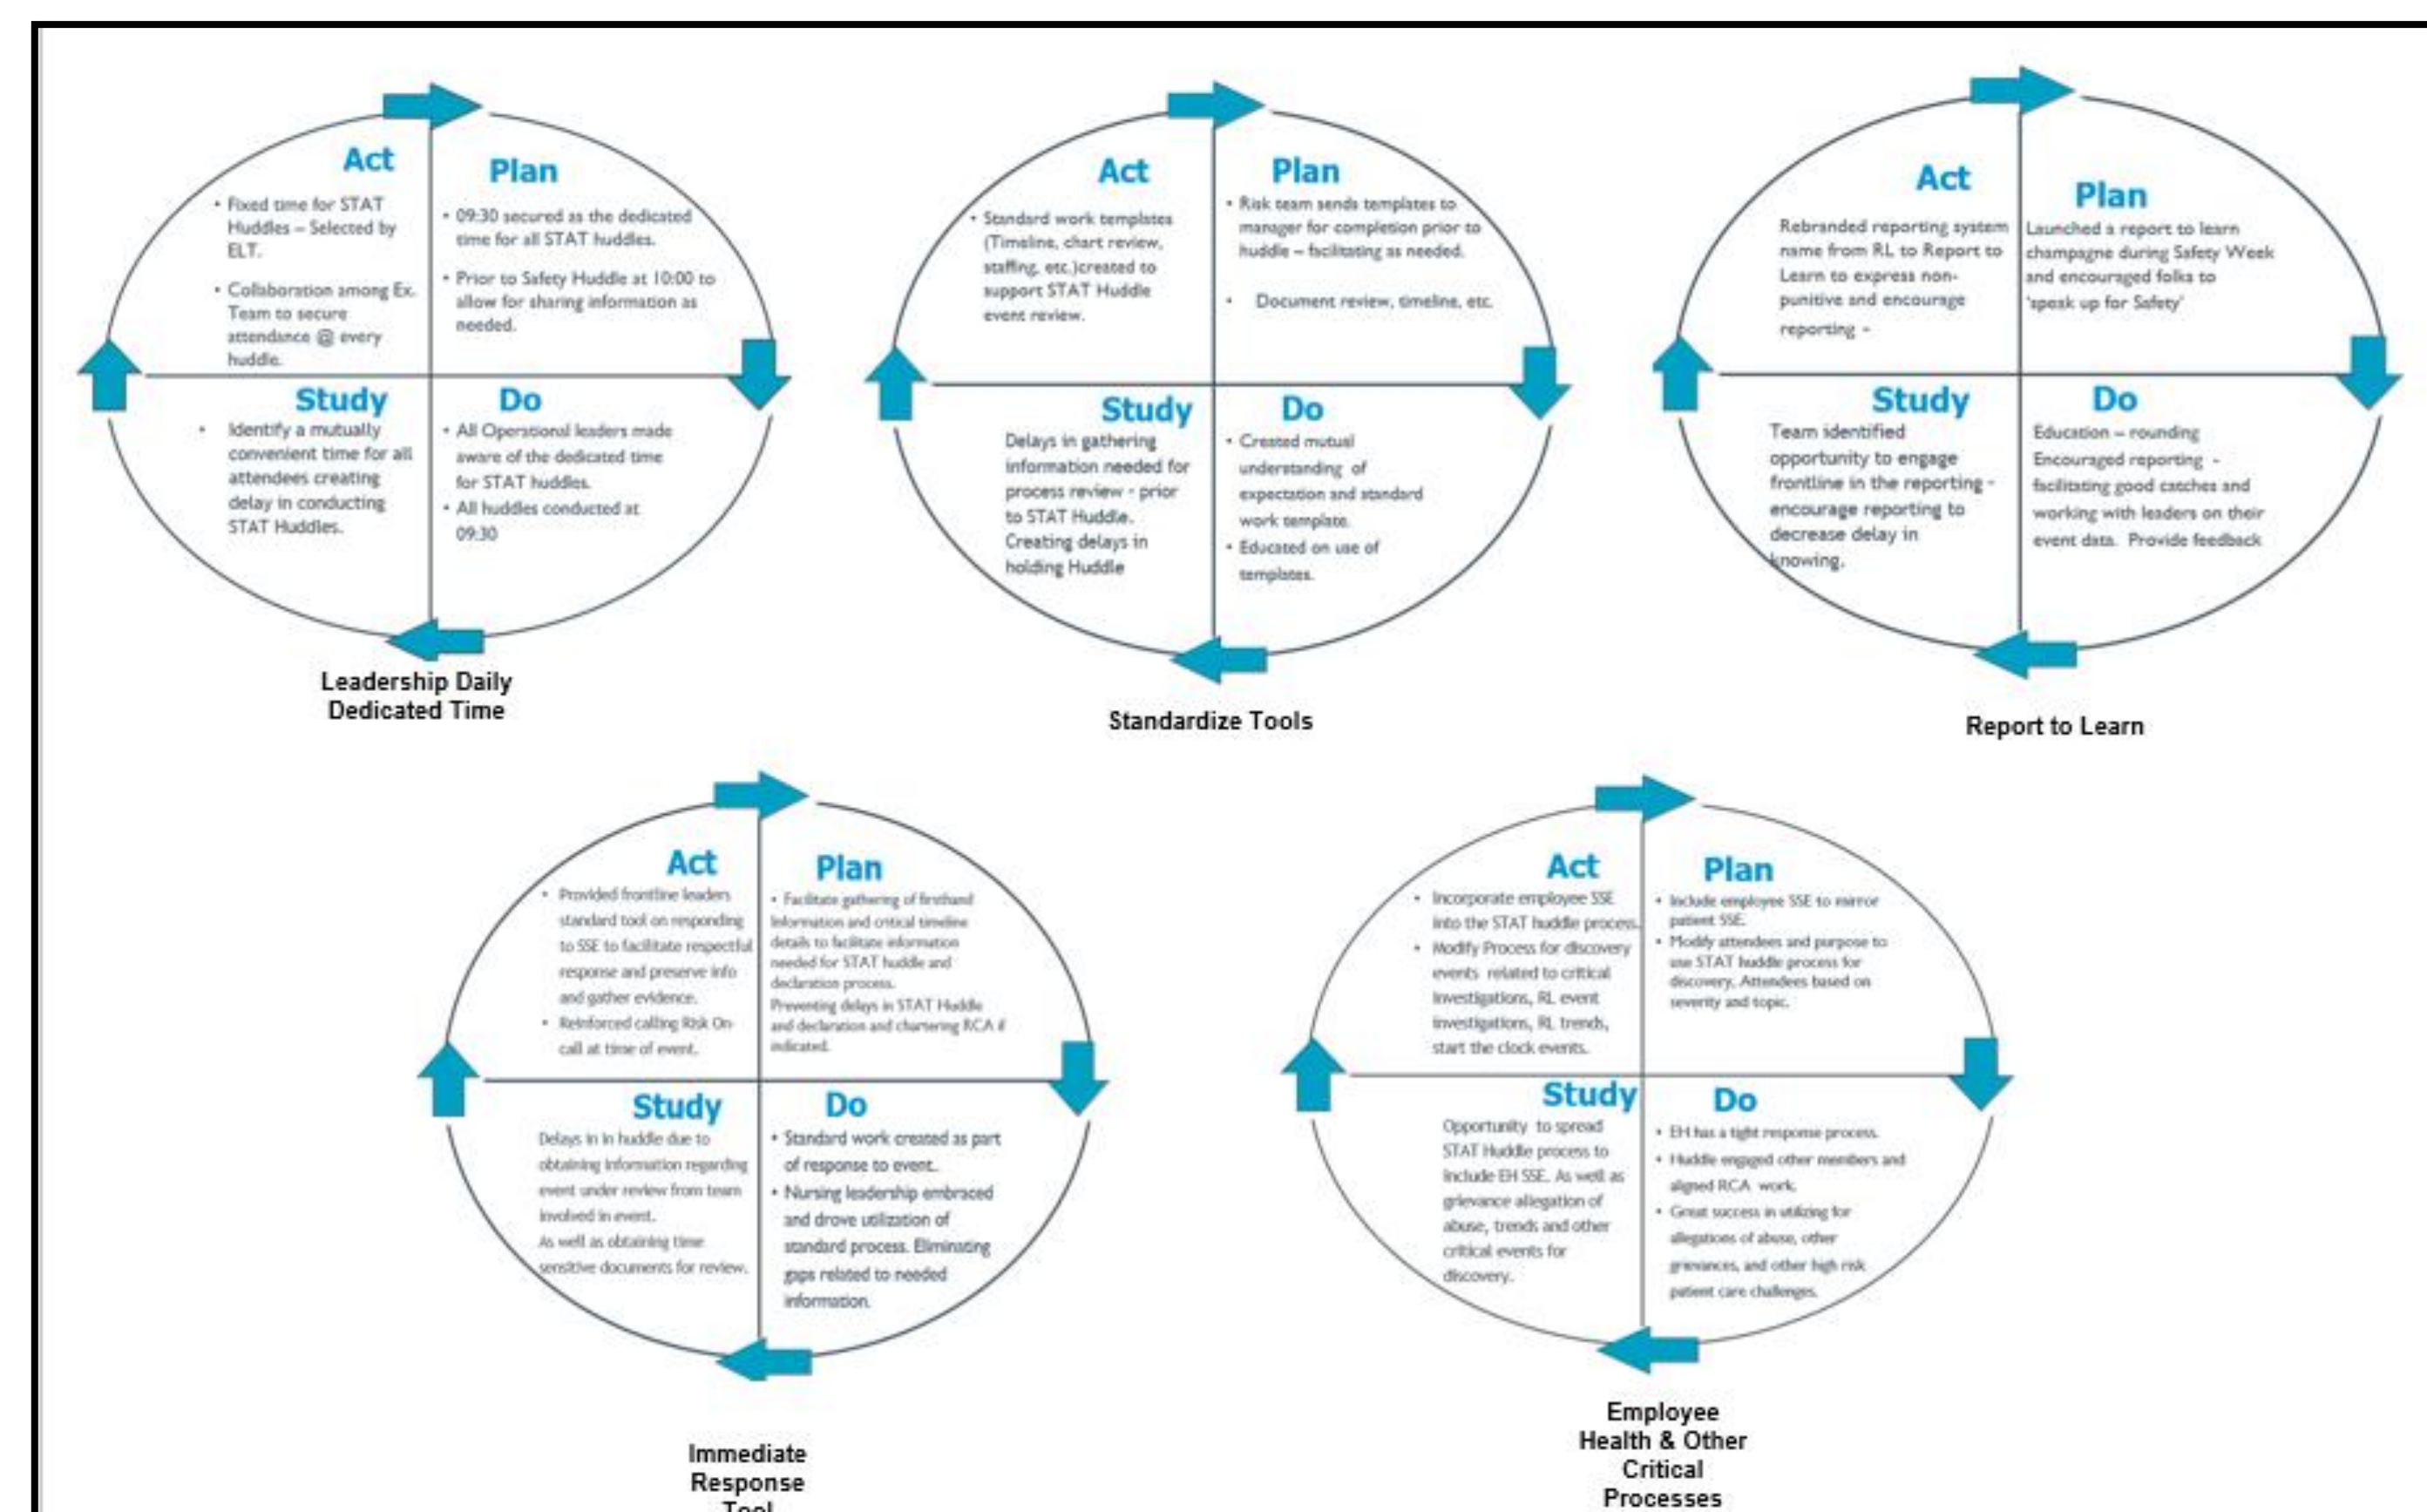

Created standard workflow with visual and standardized investigative and huddle templates framed around HPI high reliability tools.

STAT Huddle let with standard work driven by ppt. templates containing two introductory slides reinforcing education on the process and the why.

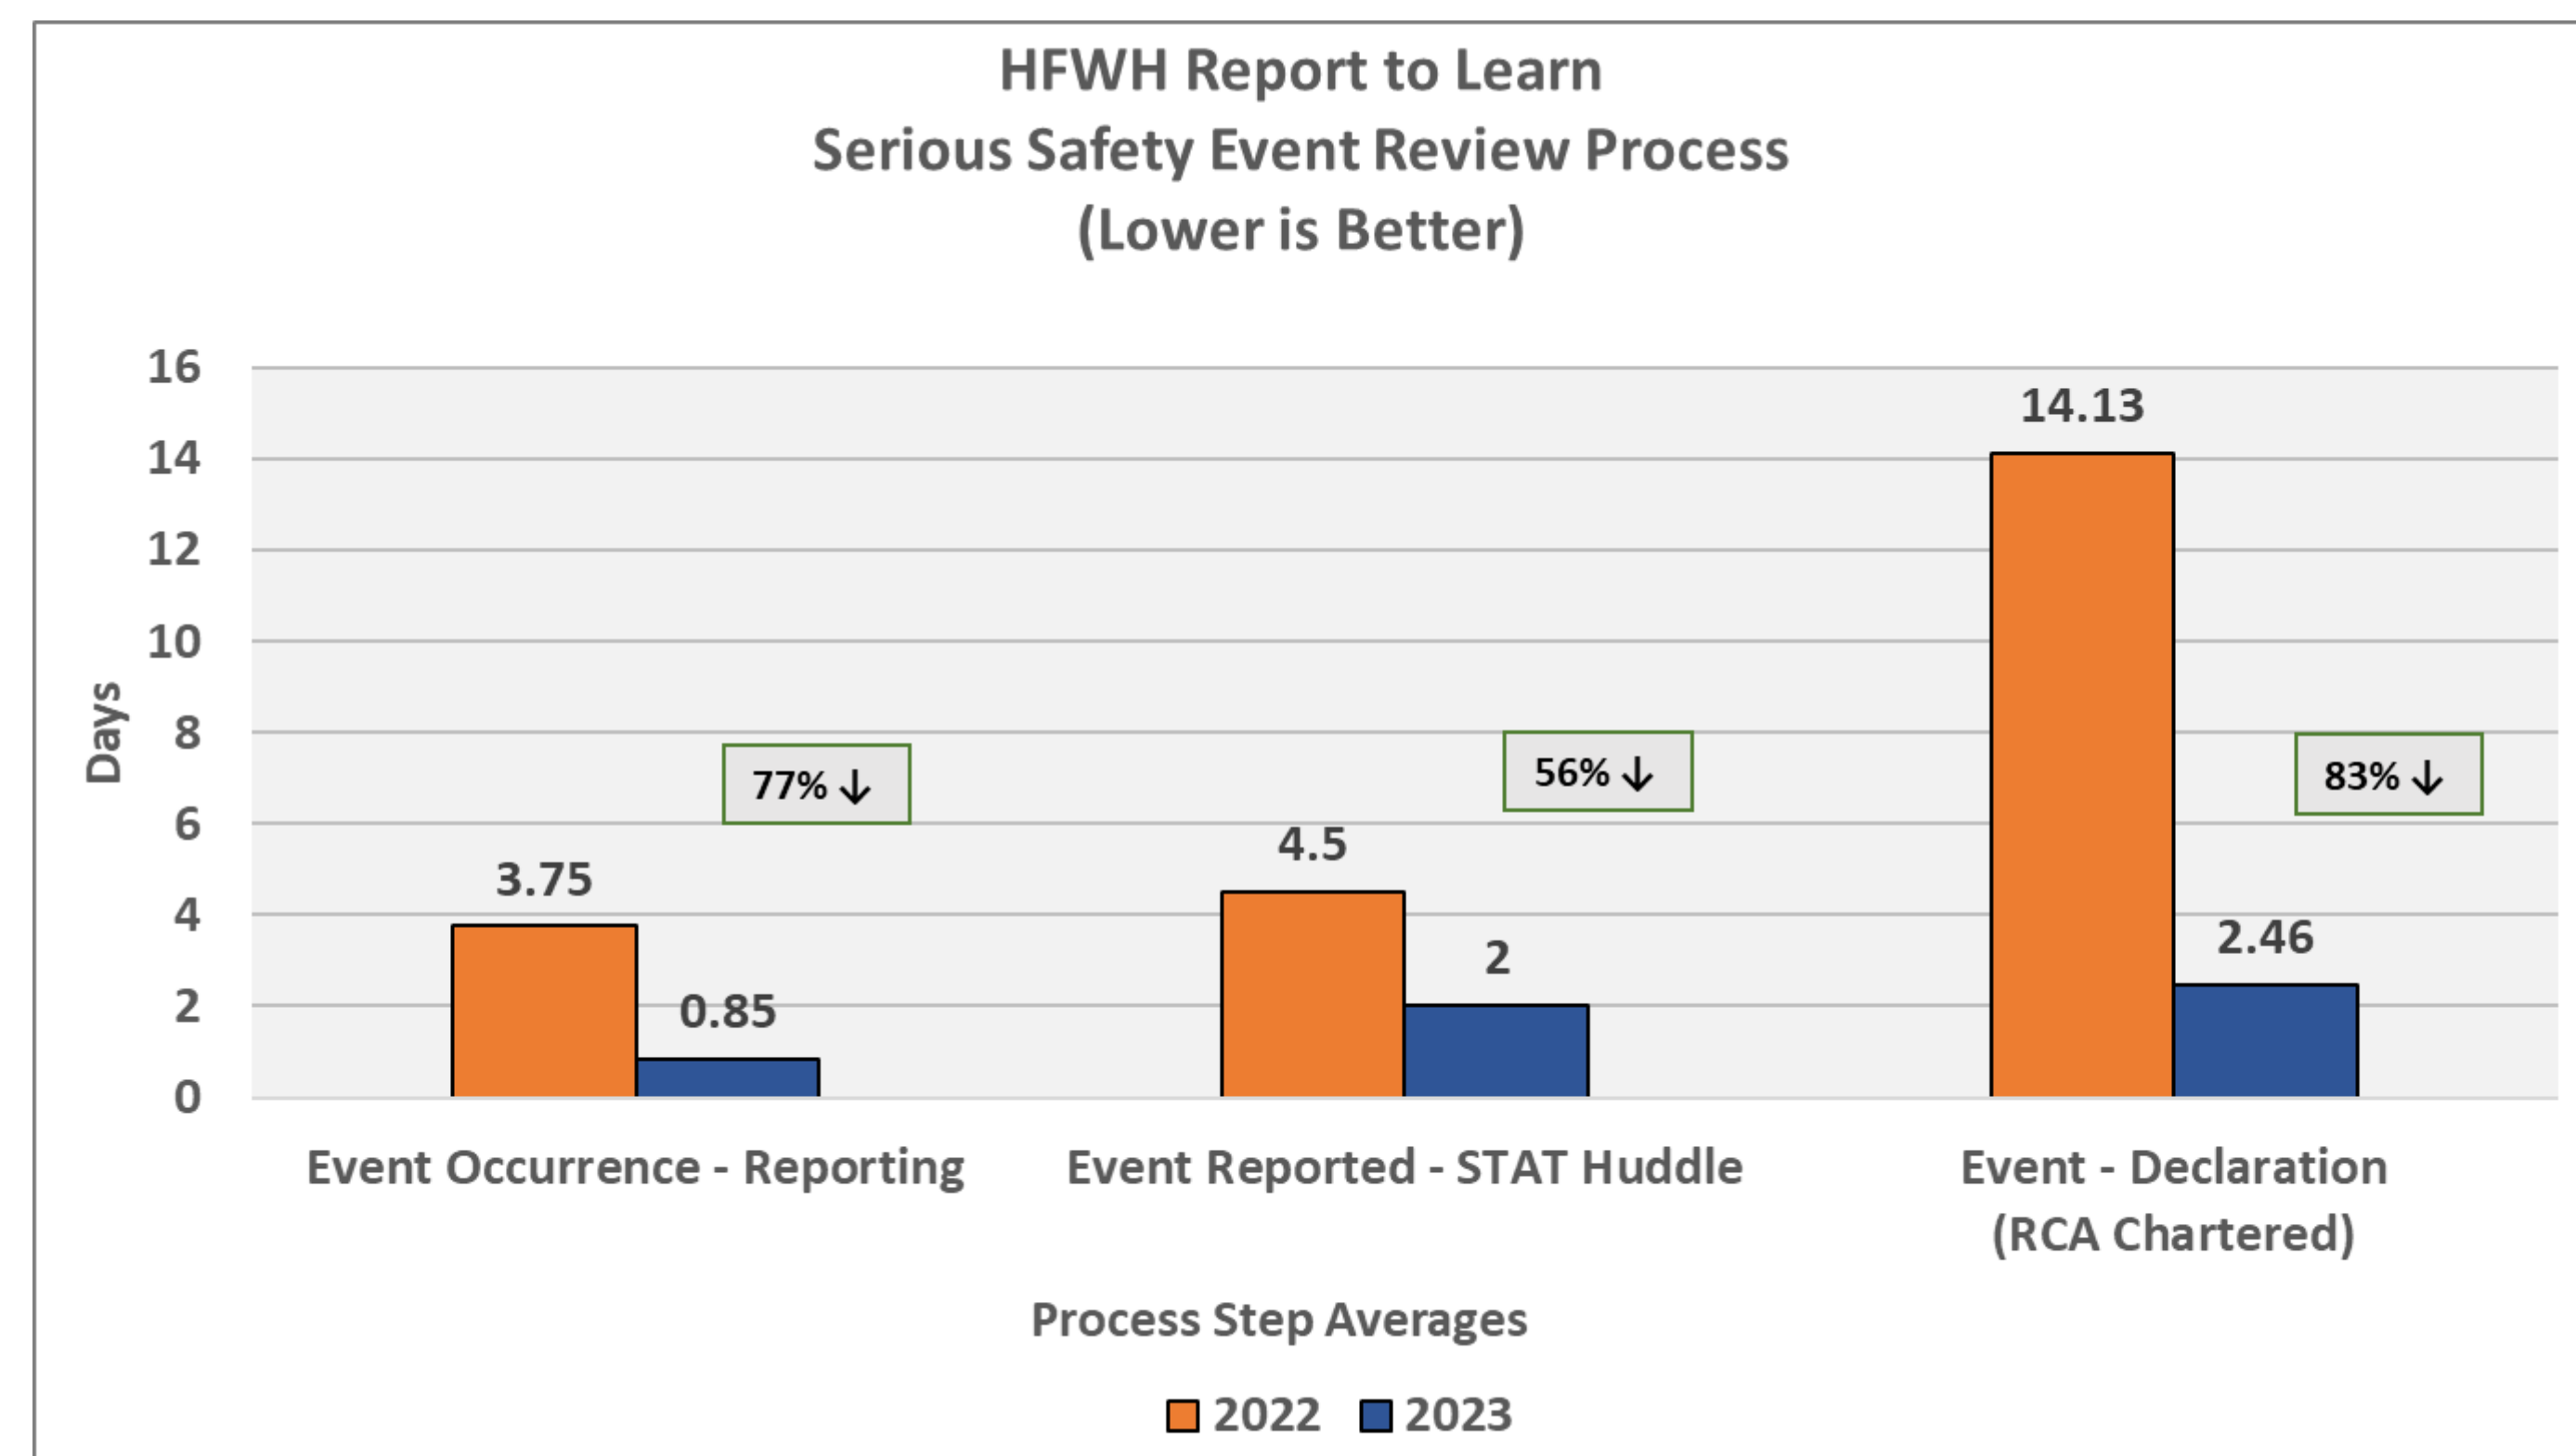

Small tests of change over 18 months to enhance and address opportunities and spread the gains to other processes and across the healthcare system.

CHECK (EVALUATION OF CHANGES)

MEASURES

ACT: SUSTAIN AND SPREAD

- Sustain: 56%-83% improvement seen across the process aims. We continue to monitor each event for opportunity and have stabilized our process. The next cycle improvement in aimed at empowering frontline team members to ‘stop the line’, call a Safety STOP to go further upstream in process and engage leadership at time of event or to prevent the event.
- Internal spread: We have taken STAT huddle process and utilized similar model for discovery huddles for events requiring further information from RL event review, house manager reports, care experience, and other trigger tools.
- System Spread: Risk Specialist presented process on 6/22/23 Risk Lead meeting hosted at HFWH. Following the presentation, 3 of our business units attended a HFWH STAT huddle, requested and received our standard tools/templates and have implemented a similar process.

KEYS TO SUCCESS / LESSONS LEARNED

- Executive Leadership** facilitating and mentoring teamwork, improvement, respect and psychological safety.
- Engagement and leadership by HFWH leadership team, frontline nurse leaders, and medical staff leadership
- Just Culture – Nonpunitive approach to reviews.
- Protected time on leaderships calendar (Hard Stop)
- Standardized process with standard work Instructions
- Quality Risk Specialist partnership with frontline leaders in a way that created an environment where people feel comfortable to raise concerns and ask questions.
- The process has fostered teamwork with shared accountability and expectation and support to act in a safe and respectful manner.
